

March 2024 ACS Rail Updates

Welcome to the **March 2024** edition of ACS Rail updates.

The following pages contain summaries of updates which may be relevant to you. Please brief and distribute this information to the relevant people as per your internal procedures.

BRIEFING REQUIREMENTS:

NOTE: Contractors are responsible for arranging and undertaking and recording their own Safety and Awareness Briefings in accordance with their own processes and procedures.

Free Access to Network Rail Standards

Free access

to Network Rail's extensive catalogue of standards and controls documentation is now available via the Network Rail Standards Portal

<https://standardse-networkrail.msapproxy.net/>

New users, please register for access to the Network Rail Standards Portal by [completing this registration form](#), so that your new log in account can be set up.

Please ensure that you use your individual company email address, and not a generic email address.

If you have any queries re the registration form or the Network Rail Standards portal, please email: STSupplierSupport@networkrail.co.uk

Changes to Network Rail Standards

Issue 131: 02nd March 2024 – 31st May 2024

The Network Rail Standards catalogue is currently unavailable but will be available again shortly.

Standards Change Overview – March 2024

Note: Entries in **RED** denote a standalone standard withdrawal.

- [Using Standards](#)
- [Finding and staying up-to-date with standards](#)

Railway Group Standards (RGSs)

Mandatory requirements for the GB mainline railway system are defined in Railway Group Standards (RGSs). They facilitate the management and operation of the mainline railway as a shared system. RGSs set out technical requirements applicable to vehicles or the infrastructure, or processes applicable to transport operators.

Standards Catalogue <http://www.rssb.co.uk/railway-group-standards>

Rule Book (GE/RT8000)

The Rule Book (GE/RT8000) and other National Operations Publications are documents that contain direct instructions for railway staff.

The Rule Book is held in printed copy by over 100,000 people, and as such is probably the best known and most widely distributed in the entire RSSB catalogue. Even greater numbers of people are known to use it as a reference and information document both from the United Kingdom and abroad using the online version.

You can still order hard copies of individual standards and Rule Book modules or handbooks from Willsons External link (Tel: 01636 702334) or download them from the Railway Group Standards section of this site.

Rule Book App

Get 24/7 access to the Rule Book via your phone, tablet, desktop or laptop with the Rule Book App. It's easy to use, search, personalise and update, and you can acknowledge amendments with one touch. Find out more on our dedicated [Rule Book App page](#).

Rule Book Briefing Leaflet

[GERT8000-RBBL Iss 39.1](#)

Each issue of the Rule Book Briefing Leaflet contains a summary of the changes being introduced to GERT8000.

GE/RM8000 Master Module Manual

RSSB has produced this manual to provide end-users with access to the content of GE/RT8000 (The Rule Book) that is relevant to all roles as defined in the Rule Book Matrix published by RSSB:

Rule Book Module Matrix: <https://www.rssb.co.uk/-/media/Project/RSSB/RssbWebsite/Documents/Public/Public-content/Using-Standards/Rule-Book-Module-Matrix.xls>

Modular Rulebook GE/RT8000

PTS Only

In most cases only PTS handbook is required, unless one of the following applies:

1. Index, amendment module and Module *G1* to be issued to the following:

Supervisors and managers who issue publications
Staff who operate signal post replacement switches
Staff who place protection for Line Blockage or T3
Staff who secure points
Those who use tents on or near the line

2. Index and amendment module to be issued to the following:

Lookouts
People who take charge of cranes and equipment which could foul an open line
People who take charge of work on or near points
People who carry out patrolling/inspecting duties

Other competencies (IWA, COSS, PC, ES, MC, CC)

GERT8000-AC Iss 7	Dec 2021	AC electrified lines	You will need this module if you carry out the duties of a train driver, guard, shunter, designated person (DP), signaller, crossing keeper or person in charge of sidings in AC electrified areas.
GERT8000-DC Iss 5	Dec 2021	DC electrified lines	You will need this module if you carry out the duties of a train driver, guard, shunter, designated person (DP), signaller, crossing keeper in DC electrified areas.
GERT8000-G1 Iss 9.1	Dec 2022	General safety responsibilities and personal track safety for non-trackworkers	You will need this module if you carry out the duties of: <ul style="list-style-type: none"> • a train driver • a guard • a shunter • a designated person (DP) • a signaller • a crossing keeper • platform staff.

Rule Book			
Doc No & Issue	Issue Date	Title	Synopsis
GERT8000-HB1 Iss 7	Sep 2021	General duties and track safety for track workers	This handbook is for those personnel who need to go on the operational railway to carry out their duties, with the exception of a train driver, guard, shunter, signaller, crossing keeper or designated person (DP).
GERT8000-HB2 Iss 2	Sep 2015	Instructions for track workers who use emergency protection equipment	This handbook is for those personnel who need to go on the operational railway to carry out their duties and have been trained to carry out emergency protection. It does not apply to: train drivers, guards, shunters, signallers, crossing keepers and those who act as a designated person (DP). This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB3 Iss 3	Sep 2014	Duties of the lookout and site warden	This handbook is for those personnel who have duties of the lookout and site warden. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27).
GERT8000-HB4 Iss 2	Sep 2014	Duties of a points operator and route-setting agent - moving and securing points by hand	This handbook is for those personnel who has duties of a points operator and route-setting agent - moving and securing points by hand. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27).
GERT8000-HB5 Iss 2.1	Dec 2022	Handsignalling duties	This handbook is for those personnel who carry out handsignalling duties The Rule Book has been reviewed to remove cases of gender-specific language which can be taken as an assumption that only males are involved. All references to 'pilotman' in handbook 5 have been changed to 'pilot'.
GERT8000-HB6 Iss 7	Sep 2021	General duties of an individual working alone (IWA)	This handbook is for those personnel with general duties of an individual working alone (IWA).
GERT8000-HB7 Iss 8	Sep 2021	General duties of a controller of site safety (COSS)	This handbook is for those personnel who have the general duties of a controller of site safety (COSS).
GERT8000-HB8 Iss 9	Sep 2022	IWA, COSS or PC blocking a line	You will need this handbook if you carry out the duties of a IWA, COSS or PC blocking a line.
GERT8000-HB9 Iss 8	Sep 2022	IWA or COSS setting up safe systems of work within possessions	You will need this handbook if you carry out the duties of an IWA or COSS setting up safe systems of work within possessions.
GERT8000-HB10 Iss 5	Sep 2023	Duties of the COSS and person in charge when using a hand trolley	You will need this handbook if you are the COSS or SWL and person in charge when using a hand trolley.
GERT8000-HB11 Iss 10	Sep 2022	Duties of the person in charge of the possession (PICOP)	You will need this handbook if you carry out the duties of the PICOP.
GERT8000-HB12 Iss 9	Sep 2022	Duties of the engineering supervisor (ES) or safe work leader (SWL) in a possession	You will need this handbook if you carry out the duties of the ES or SWL in a possession.
GERT8000-HB13 Iss 4	Sep 2023	Duties of the person in charge of the siding possession (PICOS)	You will need this handbook if you carry out the duties of a PICOS.
GERT8000-HB14 Iss 3	Mar 2021	Duties of the person in charge of loading and unloading rail vehicles during engineering work	You will need this handbook if you carry out the duties of the person in charge of loading and unloading rail vehicles during engineering work.
GERT8000-HB15 Iss 6	Sep 2022	Duties of the machine controller (MC) and on-track plant operator	You will need this handbook if you carry out the duties of the machine controller (MC) and on-track plant operator.
GERT8000-HB16 Iss 5	Dec 2021	AC electrified lines	This handbook is for those personnel who need to go on the operational railway in an AC electrified area to carry out their duties.
GERT8000-HB17 Iss 4	Dec 2021	DC electrified lines	This handbook is for those personnel who need to go on the operational railway in an DC electrified area to carry out their duties.
GERT8000-HB18 Iss 4	Sep 2015	Duties of a Level Crossing Attendant	You will need this handbook if you carry out the duties of a level crossing attendant. This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB19 Iss 5	Sep 2023	Work on signalling equipment - duties of the signalling technician	You will need this handbook if you carry out the duties of a signalling technician.
GERT8000-OTM Iss 11	Sep 2023	Working of on-track machines (OTM)	You will need this module if you carry out the duties of a driver of an on-track machine, an operator of an on-track machine, or a signaller.
GERT8000-T3 Iss 11.1	Nov 2023	Possession of a running line for engineering work	You will need this module if you carry out the duties of a driver or signaller.

Controlled Documents

Rule Book			
Doc No & Issue	Issue Date	Title	Synopsis
GERT8000-T10 Iss 6	Sep 2022	Duties of a designated person (DP) and people working on rail vehicles	You will need this module if you carry out the duties of a designated person or person working on a rail vehicle.

Network Rail Safety Central – Information Section

Code of Conduct

The Code of Conduct establishes some minimum standards that Network Rail expects in their supply chain. It has been developed by Network Rail's National Supply Chain, Industry bodies, and the Unions. It will be reviewed and updated by members of these same groups bi-annually. Please email queries to codeofconduct@networkrail.co.uk

[Code of Business Ethics](#) (web page)
[Modern Slavery](#) (web page)

Network Rail Safety Bulletins

In this section you'll find copies of the Network Rail safety bulletins regularly sent out to staff working on the Network Rail infrastructure. These cover a range of different safety issues and are often issued in response to a specific incident.

<https://safety.networkrail.co.uk/tools-resources/safety-bulletins/>

You can refine your search by:

Bulletin type

- Archive - Lessons Learnt
- Archive - Safety Bulletins
- Safety Advice
- Safety Alert
- Safety Bulletin
- Shared Learning

There will also be an archive of past bulletins, so you can download any that you missed, or want to read again. **Please download them for the FULL TEXT OF THE BULLETINS.**

Lessons Learnt / Shared Learning

Network Rail are now producing 'Lessons Learnt' publications following events which have led to Formal investigations or local investigations where significant points of learning have resulted. Network Rail believes that these lessons will be of value for all involved in the industry and not just safety professionals, they are ultimately designed to aid prevention of events of a similar nature happening again elsewhere.

Resource Library

<https://safety.networkrail.co.uk/tools-resources/resource-library/>

The Resource Library holds a wealth of information.

SCO 24:7 (Supply Chain – Operations) Telephone

SCO 24:7 (formally the NSC247 and NDS24:7): call 01908 723500 or 085 65500 (internal)

SCO 24:7 operates 24 hours a day, 365 days of the year from the Quadrant in Milton Keynes. Our remit is to manage the real-time delivery of SCO products & services to our customers. This includes engineering haulage, materials, on track machines, infrastructure monitoring, seasonal treatment, HSEA reporting, site access services and lone worker monitoring.

Emergency

If there's a safety threat to you or to others such as:

- Animals, objects or people on or near the track
- Damage or fault at a level crossing
- A vehicle has hit a bridge
- A broken fence or open gate allowing access to the track

Please call Network Rail Emergency 24-hour helpline immediately: **03457 11 41 41**

To report a crime

Please contact the British Transport Police: **0800 40 50 40, 999 or Text 61016**

HSE Fatigue and Risk Index (FRI) Calculator

The Fatigue Risk Index (FRI) has been withdrawn from the HSE website. The reasons for this are:

- The software platform is an older Excel that can no longer be supported on the HSE website.
- The design of the FRI requires improvement to promote better understanding of its outputs, its limitations and its role in a Fatigue Management System.
- In its current format, there have been case of the FRI being issued in order to justify work patterns that clearly require further action to reduce fatigue-related risk.
- FRI users who have access to the FRI in its current format can continue to use it, provided you have the necessary expertise to use the tool and understand the outputs and limitations.

Following feedback, we are making the tool available, as well as how to documents, to aid with calculations.

Contact:	Barry Miller 07395394367

Image from Acusensus

Overview
 Recently an employee of Network Rail was photographed by an Acusensus AI camera while driving to site on a highway at 58MPH in a 60mph area— However they received a Notice of Intended Prosecution for using a mobile phone whilst driving.

Underlying Cause:
 The driver had used What3Words to navigate to the access point and was going to utilise the Air Play system with in the vehicle, but during the journey the connection cable began to fail so the GPS instructions did not stay on the vehicle display.
 As traffic increased the GPS provided a alternative route, the member of staff accepted the diversion on his mobile phone and was photographed by a Acusensus AI camera.
 This new type of Camera not only identifies exceeding speed limits, but also non wearing of seat belts, using mobile devices while driving and other dangerous activities while driving.
 The driver was not exceeding the speed limit when photographed

Key Message:
 Can you explain what the Highway code says on the use of equipment whilst driving?
 Can you state the applicable Life saving rules when driving? (Hint—there are 5 in total !
 Where do you pull over and park to have interactions with mobile phone calls, e-mails, Navigation aids, etc to ensure you are somewhere safe and appropriate?
 How often do you ensure the vehicle is in neutral and handbrake is engaged.

Construction (Design & Management)

What is CDM?

Construction (Design and Management) CDM is :

- the law that applies to the whole construction process on all construction projects, from conception to completion
- there are key duty holders with responsibilities that they must do to comply with the law to ensure projects are carried out in a way that secures health and safety.

What is the Purpose of CDM?

Whatever your role in construction, CDM aims to improve health and safety in the industry by helping you to:

- sensibly plan the work so the risks involved are managed from start to finish
- have the right people for the right job at the right time
- cooperate and coordinate your work with others
- have the right information about the risks and how they are being managed
- communicate this information effectively to those who need to know
- consult and engage with workers about the risks and how they are being managed

Who are Duty Holders?

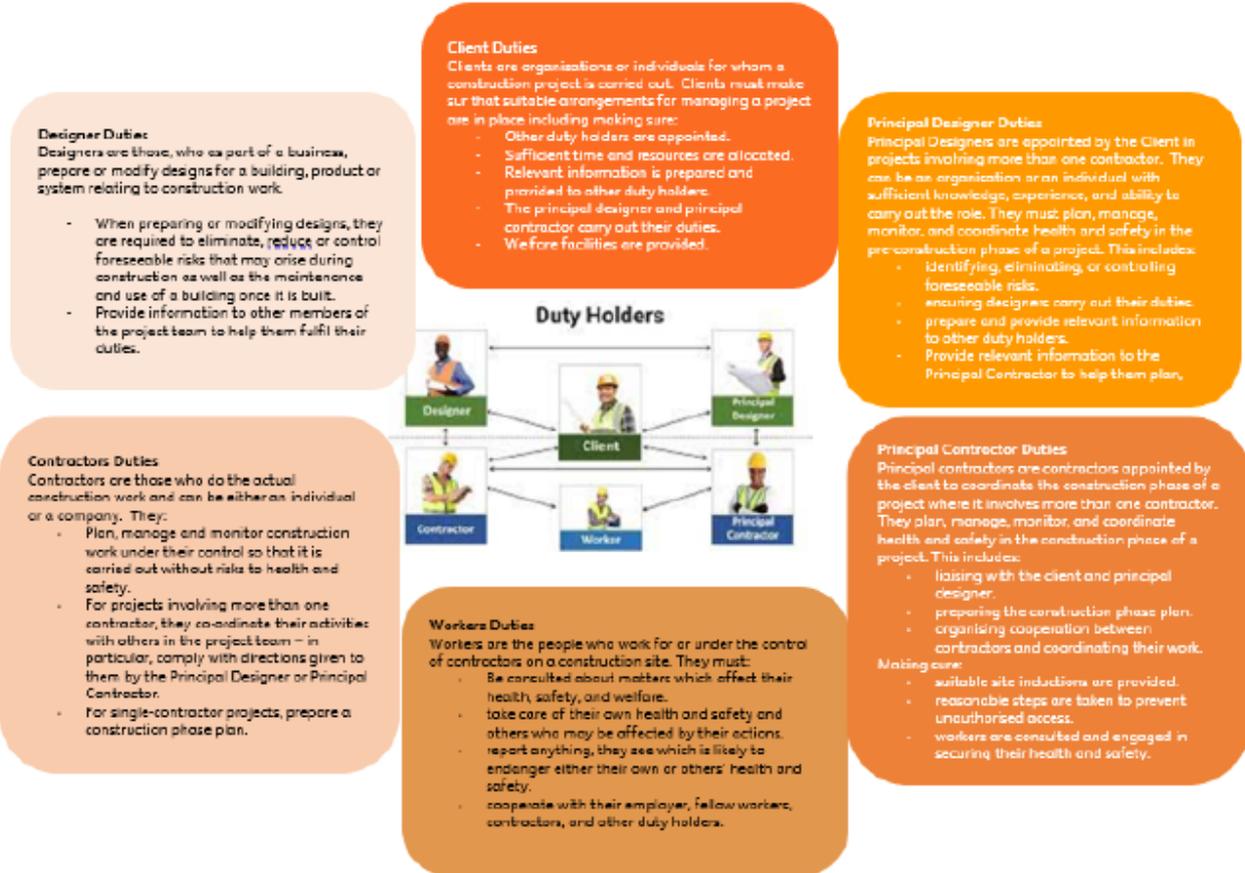

Duty holders have certain responsibilities under CDM. The duty holders are:

- Clients (there are also domestic clients)
- Principal Designers / Designers
- Principal Contractors / Contractors
- Workers

The image shows the cover of an HSE guidance document. At the top left is the HSE logo. The title is "Managing health and safety in construction" with the subtitle "Construction (Design and Management) Regulations 2015". Below the title is a photograph of people in business attire looking at architectural blueprints on a table, with a blue hard hat and a yellow measuring tape also on the table. At the bottom of the cover, it says "Guidance on Regulations" and "The Health & Safety Executive (HSE) has a guidance document that supports CDM 2015 and explains it in more detail". A QR code is located in the bottom right corner with the text "SCAN ME" below it.

Construction (Design & Management)

Key elements to securing construction health and safety

The key elements, include:

- managing the risks by applying the general principles of prevention;
- appointing the right people and organisations at the right time;
- making sure everyone has the information, instruction, training and supervision they need to carry out their jobs in a way that secures health and safety;
- duty holders cooperating and communicating with each other and coordinating their work;
- consulting workers and engaging with them to promote and develop effective measures to secure health, safety and welfare

Mandatory Biodiversity Net Gain comes into force in England

What is BNG?

Biodiversity Net Gain (BNG) is a policy to create and leave natural habitats in a better state than before development took place. It delivers measurable improvements for biodiversity by creating or enhancing habitats in association with development. This is measured using a tool developed by DEFRA. BNG can be achieved on-site (of the development), off-site or through a combination of on-site and off-site measures. It requires a **minimum of 10% uplift** in nature and biodiversity than before any development began. Habitat must also be in place and maintained for at least 30 years. Under the Environment Act (2021) **BNG requirements will come into law from February 12th 2024.**

Why is it important?

The 2023 State of Nature report suggests the UK is one of the most nature depleted countries in the world. This is despite legislation and policy to protect biodiversity and wildlife. Whilst certain sites and species are protected, there are limited mechanisms to value, maintain, enhance and create wildlife habitats beyond protected sites. As a result, most habitats continue to be lost to development.

What does this Legislative change mean for projects?

This law applies to England, with Wales and Scotland currently developing slightly differing schemes. This change will apply to NR projects that require planning permission. The BNG law does not apply to permitted development, however Network Rail has committed to a business wide No Net Loss by 2024. Across the NR estate the company has also pledged to a 10% Net Gain by 2035, as outlined in the Environmental Sustainability Strategy. The requirement for BNG assessments are also outlined in Standard NR/L2/ENV/015 and NR/L2/ENV/122.

UK wildlife expected to benefit from the policy changes

Biodiversity Net Gain lessons learnt so far across Eastern Capital Delivery projects

Designs change! Ensure you have a buffer zone to achieve the minimum of 10% in case design changes alter land availability.

Engage with local wildlife groups in the design stage to make sure the best planting is made to support the local area.

Projects in CP7 MUST ensure there is budget allowed for BNG. Retrospective consideration can be far more costly than early conversations.

Ensure competence within teams, specifically design teams. Integration with the ecologists is a must for a good landscape design.

Have early discussions with the relevant maintenance teams if BNG is being completed on NR land. Legislation mandates that the habitat must be maintained for 30 years.

Need further guidance? Check out the Natural England BNG brochure here for benefits:

In this week's issue - Signalling shared learning and thefts from Network Rail depots

Signalling shared learning

The signalling shared learning pack provides details of events and incidents that have happened on signalling projects between July 2023 and December 2023.

Included in the pack are the following :

- 35th anniversary of Clapham Junction disaster
- Signal Maintenance Testing Handbook (SMTH) crossed wires
- TPSw intervention
- Cable ties on gantry

- Signaller reminder on ARS workstation
- LED route indicators

[Download the shared learning document here.](#)

Network Rail depot thefts

Since 15 October 2023, the British Transport Police have had reports of a series of burglaries/thefts from Network Rail depots across the following areas: Paddock Wood, Lenham, Dartford, Swanley, Hither Green, Orpington, Sevenoaks, Tonbridge, Ramsgate, Sittingbourne and Ashford. These may be connected to other thefts that have taken place in Colchester, Norwich, Luton, Nuneaton and Redhill.

CCTV images show the suspects wearing Network Rail PPE and using vehicles with cloned number plates.

White Citroën Berlingo CE17GKU (Believed to be cloned plates)

Home Hib (02/01/2024) White van, believed to be Peugeot.

Silver Renault Kangoo RE59VKB Colchester 22/11/2023

- If you have any information relating to these thefts, please contact [Stacey Turner](#).
- If you see any suspicious behaviour or need to report a possible theft, please contact BTP on 0800 40 50 40.
- If you see any criminal activity taking place, please call 999.

Please send your feedback on the newsletter to southernregioncomms@networkrail.co.uk

Learning from Incidents: Dumper Overturn

Incident Overview

- A 3T Wheeled Dumper was being utilised to transport excavation arisings from the worksite on the platform to the designated stockpile located at the access point ready for onward collection.
- The dumper overturned whilst travelling to the access point. The dumper route was a regular activity, however over time the ground conditions had deteriorated to the point of regular intervention.
- The Operator had just completed a reverse manoeuvre and turned the dumper to face the area. As the operator began the tipping operation the front left wheel of the dumper rose, changing the centre of gravity of the vehicle. The vehicle overturned onto its right-hand side. The operator suffered a sprained wrist.

Learning Points

- The ramp and tipping area had deteriorated and softened due to material being tipped and spread in persistent wet weather, however the risk had not been identified during the works.
- The ramp and tipping area configuration was sub-optimal and redesigned to create distinct segregation.
- The preservation of evidence was not followed, the dumper was righted immediately due to environmental (spillage) concerns.

* Photo in banner header is not of the incident it is taken from the internet for illustrative purposes only

Eyes on Safety

Eye protection on our sites

We are mandated to have in place suitable systems to control the risk of eye injuries, and as a minimum all staff must wear appropriate eye protection.

Eye injuries can lead to long-term damage, vision impairment, or even the permanent loss of your sight, all of which could be life changing. Eye protection is more than just Personal Protective Equipment (PPE), it is an investment in our own wellbeing.

Toolbox Talk

The project team at Cambridge South Enhancements delivered a toolbox talk on eye protection recently with a twist, all the attendees were blindfolded! The group were tasked with undertaking simple activities including drawing a square, asking a colleague to write their name in the square and folding a sheet of paper into an aeroplane. This helped reinforce the challenges of losing the sense of sight and drive home the message of the importance of eye protection.

The toolbox talk was well received and many of the participants commented on how thought provoking the session was in sending a clear message on the importance of our eyesight and eye protection

Things to consider:

- Before starting any task, conduct a risk assessment to identify any potential eye hazards such as flying objects, chemical spills and any other potential sources of eye injuries.
- Wear the right eye protection for the activity you are undertaking
- Regularly clean your eye protection equipment to remove dirt, dust, or any other substances that may impair visibility.
- Inspect your eye protection regularly for any damage such as scratches or cracks and replace immediately.

RSSB Sustainable Rail Blueprint

The Rail Safety and Standards Board (RSSB) have created a sustainable rail blueprint, setting out range of strategic aims and focus areas, marking out the framework for the way forward for sustainable rail, helping to inform discussion and drive rail transformation, through its contribution to the long-term strategy for rail.

Click or scan here to learn more

The Blueprint sets out 11 sustainable rail topics, across emissions, natural environment and social sustainability. Each topic is underpinned by a flagship goal, strategic aims and a route-map, which fully define what the industry needs to achieve. These goals were formed as part of a cross industry collaboration, overseen by the DfT

The Goals

Emissions

-  **Net Zero Carbon Rail**
A railway that's central to delivering a net zero economy by 2050.
-  **Clean Air**
A railway that supports a positive impact on local air quality.
-  **A Quieter Railway**
A railway that manages noise and vibration to protect the health and wellbeing of its colleagues, customers and local communities.

Natural Environment

-  **Prepared for a Changing Climate**
A railway that's resilient to extreme weather and prepared for a changing climate.
-  **A Railway for Nature**
A railway that supports a thriving natural environment, for the benefit of people and wildlife.
-  **Zero Waste**
A railway that uses resources efficiently and supports a collaborative circular economy.
-  **Protect & Conserve Water**
A railway that uses water sustainably and supports improved water quality.

Social Sustainability

-  **Maximising Social Value**
A railway that's committed to the creation and maximisation of social value.
-  **Rail at the Heart of Communities**
A railway that engages and empowers its communities.
-  **Careers, Economy & Sustainable Growth**
A rail industry that's resilient and innovative, providing good jobs and supporting sustainable economic development.
-  **People-centred Rail**
A railway that's inclusive and accessible, and committed to the wellbeing of colleagues, customers and local communities.

The Common Solutions

-  **Zero Emission Traction**
A clear investment pathway to clean, decarbonised traction needs to be agreed and supported.
-  **Seamless Journeys**
Rail must fully integrate as part of a sustainable, joined-up transport system to support the shift of people and goods onto railways.
-  **Nature-based Solutions**
An industry-wide approach to nature-based solutions is needed, to maximise the social and environmental benefits of rail industry land.
-  **Social Value**
Social value must be adopted and embedded across the industry to increase quality of life and maximise the benefits of rail to society.
-  **Data Framework**
A data framework is needed to measure, collate, and report progress against sustainable rail goals.
-  **Culture for Sustainability**
Making sustainability part of everything we do must be a core pillar of the culture of the rail industry.

Who Needs to be Involved?

-  Infrastructure Managers
-  ROSCOs
-  Passenger Train Operators
-  Supply Chain
-  Freight Train Operators
-  Governments & Rail Regulator

Infrastructure Projects have a vital role to play in achieving these industry goals. Every positive change we make contributes to making the railway more sustainable

Safety Bulletin

Colleague Near Misses in Scotland

Issued to: Scotland's Railway colleagues and Principal Contractors

Ref: SRB 23-21L

Date of issue: 12th December 2023

Location: Scotland's Railway

Contact: Iain Watson
iain.watson@networkrail.co.uk

Overview

When we go on the infrastructure and trains are running, it's an environment that has the greatest potential for harm to colleagues.

In Scotland's Railway we've taken pride in our safety arrangements that reduced our near miss events to zero for almost two years.

That great record is now over. We've exposed colleagues to three near misses in the last five months.

While these events are being investigated, this Bulletin is intended to start conversations in your teams to reduce the likelihood of you being involved in a near miss event in the future.

Event one.

On the 30th of August 2023, a colleague from a maintenance team was carrying out Basic Visual Inspections and moved beyond their protection. They thought they saw a fault with the track and went to investigate.

Event two.

On the 8th of November 2023, a colleague carrying out structures examinations and was walking in the four foot with their back to traffic.

Event three.

On the 4th of December 2023, colleagues responding to a points failure moved beyond their protection limits because they saw another fault and went to investigate.

Discussion Points

Discuss your reaction to the information in this bulletin.

Discuss the importance of strictly following your approved Safe System of Work.

Discuss how you would manage changes to your planned work.

Discuss what you would do if you saw something that you thought was unsafe.

Discuss how you can stay aware of your surroundings and the risks that may be present.

Always apply 'Take 5' - Stop, Review, Assess and Adjust

Never leave your agreed worksite limits

Shared Learning

Learning from History Elsenham Level Crossing Incident

The Incident

On the 3rd December 2003 teenagers Olivia Bazlinton and Charlotte Thompson were looking forward to going Christmas Shopping and were going to catch the train to Cambridge from Elsenham Station. Waiting at the pedestrian level crossing at Elsenham Station, they saw their train to Cambridge go past and draw into the platform. They opened the wicket gates to cross to the platform and catch their train but were struck by a second non-stopping train coming through towards Stansted Airport.

The crossing was fitted with warning lights and yodel alarms. These warnings had started when the London to Cambridge train passed and remained on as the train to Stansted approached. The girls had walked on to the crossing after the first train passed potentially thinking that this was the train that had set off the alarms and lights but had not realised a second train was approaching. The Stanstead train was on a bend and had very limited time to brake before hitting the girls.

Lessons Learnt

The risk assessment was inadequate. Low cost practicable solutions were available to mitigate these risks but were not implemented.

Ensure suitable and sufficient risk assessments are carried out for our works and controls implemented following the hierarchy of control.

The users of the crossing and their behaviour was not considered in the design of the crossing and following risk assessment was not altered to reflect this.

Consider all affected by our works from end users to operators and maintainers and ensure a risk assessment is documented.

The parents (in effect our customers) were not listened to during the original investigation and felt let down and marginalised

Engage with our customers and understand their needs and wants.

The Aftermath

Network Rail's initial response was that the crossing was safe if used correctly and that the girls had ignored the warnings. Approximately 6 years later Network Rail were prosecuted for the incident. A risk assessment for the crossing identified a number of things:

- The wicket gates should have had magnetic locks (which they didn't)
- There was a large number of users including school children (vulnerable group).
- Multiple repeat trips over the crossing were taking place (car park on the downside and paper shop on the up)
- There was only one ticket machine which meant passengers had to cross to get a ticket.
- Staggered platforms increased the risk of crossing behind trains when it pulls in order to catch it.

Internal NR staff can watch a video from the 15th anniversary of the incident here - [Elsenham anniversary \(sharepoint.com\)](https://sharepoint.com)

Environmental Risk Assessments Learning

Background

The Northumberland Line Upgrade project recently had works that required working adjacent to New Hartley Ponds Site of Special Scientific Interest (SSSI), a protected ecological site designated for its presence of Great Crested Newts (GCN). A Nature Space Organisational Licence was procured for the project to manage the GCN risk however further approval (Assent) may also be required from Natural England when working in a SSSI. For SSSIs located on Network Rail property, there may be a Site Management Statement (SMS) in place, which allows *certain* works to proceed along the railway without specific need for a SSSI Assent.

What Happened

In Summer 2023, the team undertook checks prior to works and identified the Site Management Statement had expired in March 2023. Weekend works had to be postponed whilst the team investigated the risk.

Following consultation with Network Rail S&SD team and project ecologists, it was deemed the works to be completed (installation of 3no. speed signs) was low risk and therefore Assent from Natural England would not be required. The NatureSpace licence, already in place, was deemed sufficient by the team following ecologist consultation.

Checking documents in advance of the works was good practice and avoided possible environmental harm or legal consequences. Due to timing, the risk decision had to be made after postponing the works. Fortunately, this activity was not on the critical path and did not have any programme implications, however a delay was easily avoidable. Lessons are being shared to avoid a similar and potentially more serious event in the future. Good communication and rapid responses to change was demonstrated by the CRSA team.

Shared Learning Outcomes

- Check the dates of all permits, licences and consents prior to all works taking place.
- Consult with ecologists or your environmental manager if unsure of ecology risks.
- Always ensure compliance with relevant licenses, permits and consents, checking.
- Make sure you update environmental documents. These are to be treated as live. This is especially the case if programmes, activities and/or locations have been amended.

It is mandatory to complete an ESMP before ANY works begin on site. This document should be treated as live and checked and updated at a minimum of every 6 months as outlined in NR Standard NR/L2/ENV/015.

HSOE FAST FACTS ALERT

DONCASTER TO SCUNTHORPE PROJECT ACCIDENT - CUT HAND

▪ November 2023

The Event

On November 22nd, whilst working within the newly manufactured and installed Scunthorpe PSP UPS REB, a member of our electrical installation team cut the back of his hand whilst drilling within the REB subfloor to install new glands for cables. The cut occurred when the drill "snagged" and forced his hand onto sharp metal of the building fabric

The operative was given first aid on site, he then attended Scunthorpe General Hospital to have the cut glued, returning to work the same day with no major injury

Earlier on the same day, the same operative had close called the REB building design for its difficulty to gland external cables stating the interface between the switchgear panels and the building type needs review

At the time of the accident, the operative had decided to remove gloves, on discussion he stated he was more concerned with the gloves being caught in the moving parts of the drill, this was against the PPE advised within the TBS.

Discussion Points and Actions:

- Have you got the right PPE for the job?
- Are you working in line with your TBS?
- Can we improve the design for cable access for this type of installation?
- Could more have been done off-site in the factory environment?
- Would a pilot hole have helped?
